The most important part does—the filling of A Restwel Mattress, which is yielded in the pod of THE KAPOK TREE that grows in JAVA.

Silk floss is nature's own bedding—and is absolutely sanitary—the fibre being solid right through—NOT hollow like most fillings, which offer a haven to homeless germs.

The silk floss in

Restwel Mattresses

is gathered in JAVA by the makers, then shipped to America, and thoroughly sterilized before being used in the scientific construction of this magnificent mattress.

A RESTWEL is not too soft—not too hard—and never gets lumpy—will outlive many coverings and be like new each time re-covered. Best quality ticking in a choice of many styles covers it when you buy it, and you may sleep on a Restwel for 60 days at our expense, if you have any doubts—we have none; that's why we sell them.

21,976 FORDS
SOLD IN SEPTEMBER

The Ford Motor Company announces that in the month of September there were sold and delivered 21,976 Ford cars. This was a gain of 11,479 cars over September, 1913. This is significant, not only because it shows that the Ford production is rapidly being increased to meet the stupendous influx of orders, but also because it demonstrates that the Ford Motor Company is maintaining the 300,000-car schedule necessary to give Ford purchasers between August 1, 1914, and August 1, 1915, a share of Ford profits. The Best That We Can Do

is to encourage our trade to buy and use better kinds of Dry Goods and Garments. This often brings the remark that they are high priced. The best proof that we have to offer is that customers using better goods consider the price lower and continue the use of better goods. We consider quality first, then make sure that the price is right.

No one is ever willing to sell our grade of goods for any less than our price.

Fashion Comments

Owing to the fact that many of the model importers have been handicapped in getting their shipments delivered in time for fall business, there are unprecedented indications that American ideas will be incorporated into the winter and spring seasons. The recent style exhibitions held by a number of prominent dressmakers and American manufacturers and designers clearly define the attitude to sever all connections with foreign types. While the current styles will show a distinctive continuance of past ideas, there will be many new and very attractive suit and coat designs.

The materials usually found in coat styles are Novelty Plaids, Wool Mixtures, Chinchillas, Overplaids, Scotch Tweeds, Wool Velours and other fabrics that blend easily with the soft lines of the separate coat styles.

Refreshments were served and it was at a late hour when the party broke.

The alderman's lighting committee is in receipt of a complaint regarding the condition of Prospect street near the railroad crossing after dark. Complaints recall the narrow escape from death experienced by two small children on the railroad crossing last week and urge that the city install more adequate lighting facilities in that locality. From twilight until 7:30 o'clock there is usually a certain amount of shouting going on, as the yard and while the trainmen are duty conscious and a flagman is always on duty at the crossing, narrow escapes of the kind cited are not always avoided. Since the removal of Louis B. Bannan from that section of the street the street which is recently occupied by dark at night and the friendly light which the window illuminations formerly shed across the tracks is missing.
